

CONTEX EventMeet™

Speed Entry into Large Event Conferences

Event conferencing presents unique challenges. From the sheer number of callers to the amount of information to be collected, it can be a daunting task to coordinate and execute each call - that is, until EventMeet.

One Click Away from the Next Event

CONTEX EventMeet is the specialized web application that streamlines caller entry into event conferences.

EventMeet gives parties an unprecedented access point from which they can instantly join the call. They need only enter the required participant and security information, and click to join.

- **Improving the User Experience:** With EventMeet, the caller is in control. There is no waiting in line for an operator, users just type in the requested information and join the call - fast, simple, and secure.
- **Ensuring Accurate Data Collection:** By empowering participants to enter their own details, EventMeet helps reinforce the accuracy of the collected information and sidesteps the hassles of transcription.
- **Minimizing Operational Requirements:** EventMeet alleviates the stress event conferencing places on your operations team, freeing them to focus on your specialized event services. With EventMeet, you can handle more conferences, control more events, and save on manpower.
- **Rich Conference Integration:** Built upon the robust CONTEXWeb™ suite, EventMeet is tightly integrated with the Compunetix award-winning event feature set, enabling users to experience all the benefits of advanced CONTEX conferencing.

Simplifying the User Experience

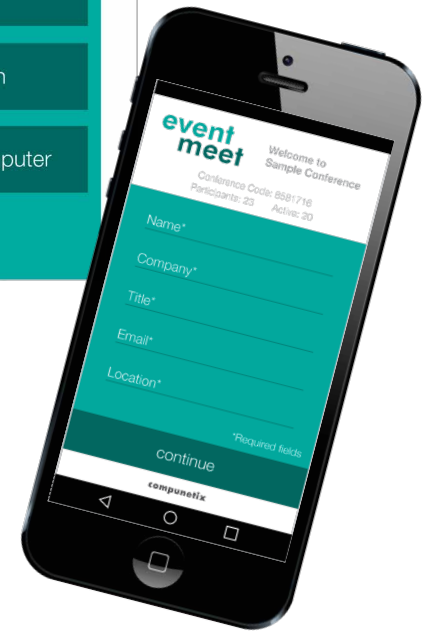

EventMeet offers several join options to expedite entry:

- **Direct Dial-out:** Dial-out can be initiated with the click of a button. Users simply specify their country and desired dial-out phone number.
- **Associated Dial-in:** EventMeet enables users to call in to their conference by providing dial-in details. A specialized data conference ID enables users to associate their information to the participant line.
- **Call Using Computer:** Using the integrated Compunetix audio client or a WebRTC capable browser, EventMeet users can make a VoIP call straight from their PCs. Once connected, participants use their microphone and speakers for the call.

Making EventMeet Your Own

Built upon the CONTEXWeb toolkit, CONTEX EventMeet features a customizable interface that can be adapted to meet your needs.

- **Custom Fields:** The EventMeet interface can prompt attendees to provide whatever information you need. Name, phone, and up to four additional user defined fields can be set for each event.
- **Brandable Elements:** From the layout, theme, color, font and more, EventMeet can be customized on a session basis - giving you control of the look and feel of the end user experience.
