Emergency Conferencing & Notification

KEY BENEFITS

- **Automatic Blast Dial**
  Allows automatic mass dial out to an emergency lists

- **Multiple Lists & Numbers**
  Supports unlimited number of emergency groups and up to 3 dial-out numbers per contact

- **Mass Notification**
  Pre-recorded messages can be quickly distributed to large groups

- **Highly Secure**
  Multiple layers of security ensure that response efforts will not be compromised

- **Quality & Reliability**
  High quality and reliable audio connection enhances critical response efforts

Immediate Response

Minimize response times by enhancing emergency preparedness and notification distribution

When an emergency occurs, it is critical that companies have the necessary tools available to respond quickly and effectively. For this purpose, Compunetix created our Emergency Conferencing offer through the ConferenceManager™ (CM) and Summit® Olympus platforms. These tools can alert and connect emergency responders or designated company personnel quickly with minimal effort. With Emergency Conferencing, you can save time, effort, and potentially save lives.

Deployed as both a stand-alone emergency tool, as well as a feature add-on to a Summit or CM general conferencing solution, Compunetix Emergency Conferencing is built to enhance existing emergency procedures and provide a reliable and secure communication channel when it is needed most.

Enhance communications when it matters most

Our solutions for emergency preparedness enable organizations to get ahead of the unexpected. By having a plan and the right tools available, businesses can significantly minimize the impact of an emergency situation.

Emergency Conferencing

In the event of an emergency, a first responder dials a dedicated number which tells the system to create a conference and triggers a blast dial-out to the other members of the response team. Each team member is then joined directly to the emergency conference in progress, or, if configured, team members are prompted to join before being added.

Emergency Conferencing Capabilities:

- Automatic blast dial to a list of emergency personnel
- Supports an unlimited number of emergency groups
- Up to 3 dial out phone numbers per person
- Phone number mapping to an emergency group, requiring no user input to initiate an emergency conference
- Blast dial initiated when first person dials in (based on dialed number), no additional user input required

Emergency Notification

Another powerful function of the emergency blast dial feature is its ability to deliver a pre-recorded message to a specified group. From emergencies to timely organization-wide updates, this feature makes it easy to get crucial messages out to large groups in a matter of minutes.

Emergency Notification Capabilities:

- Mass dial out and notification to a list of specified personnel
- Recorded message can be pre-scheduled or distributed at a moments notice
- Can direct unique messages to different groups
- Up to 3 dial out phone numbers per person
- System leaves message with recorded notification for those who do not answer the incoming call
- Emergency Notification initiated when first person dials in (based on dialed number), no additional user input required

Support for Emergency Conferencing & Notifications

DEPLOYMENT OPTIONS

Solution Add-On

Activated via license key, Emergency Conferencing & Notification can be quickly and easily added to the feature to the rich conferencing functionality of the ConferenceManager and Summit systems.

Stand-Alone Service

As a hosted service, Emergency Conferencing & Notification is cost effective and offers invaluable efficiency to emergency communication procedures without any added administration.

WEB CONTROLS

- Activate blast dial out to an Invitee List or Address Book
- Support up to ten sub conferences from the main audio conference
- Mute, Unmute, Disconnect, Hold, Add Additional Caller
- ActiveTalker™
- Viewable Listing (by name or phone number) and count of all conference participants
